

1) Adv of Technology in Education.

Roll no: 31

Ans) Nowadays technology plays a major role in educational field such as: -

- * It encourages flexible learning without physical touch. It unlocks educational boundary, so it is available to anyone irrespective of geographical boundaries.
- * It Motivates students even without direct interaction, by continuously sharing material and activities for students to work with.
- * It simplifies access to educational resources. The materials are available at public domain, public digital libraries are accessible to anyone.
- * Improve students' life skills such as writing & reading skills such as blogging, writing emails etc. Auto correct and grammar check makes them learn effectively and improve writing.
- * makes subjects easy to learn with the help of diff forms of lessons, animated, visual effects provided to the contents makes the subject more understandable.
- * promotes individual learning: Students with different needs can learn at their own pace. They can have fast learning environment, review difficult concepts at their own speed. Even it makes the struggling students to take time and learn effectively.
- * Increased collaboration b/w teachers & students. They can communicate each other effectively through meetings and share materials and

They can involve at different activities, works on different projects and attain many skills and qualities.

* encourages creativity and innovation : Since practical learning is provided, they are having hands on modernised learning with working tools and make their own ideas and apply. So it is more job oriented.
